

C·A·R·S®

Worldwide Monitoring & Control

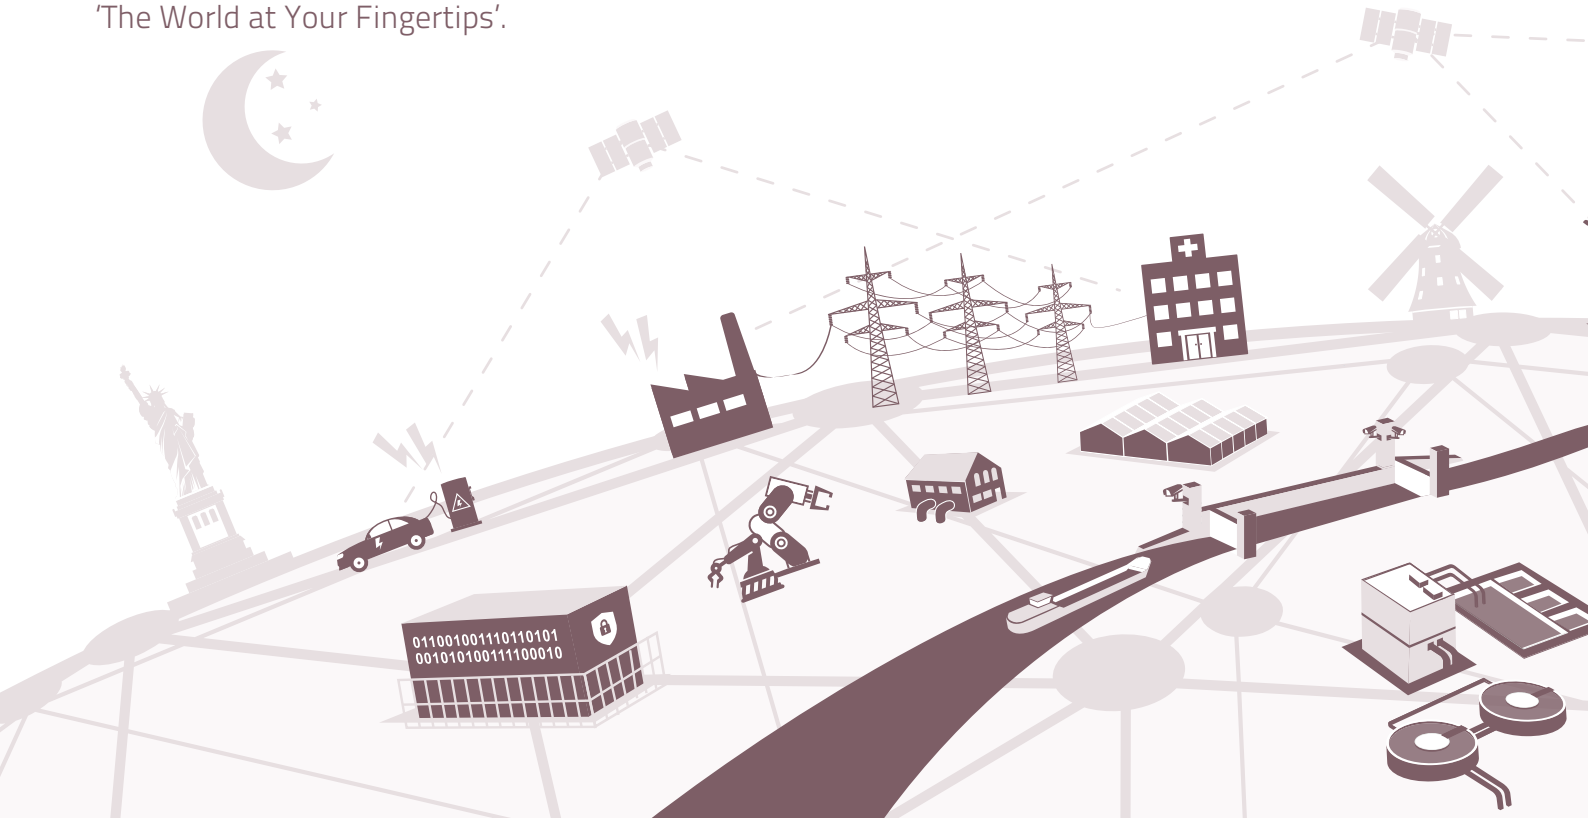

The World at Your Fingertips

C.A.R.S

Insight and influence anywhere in the world

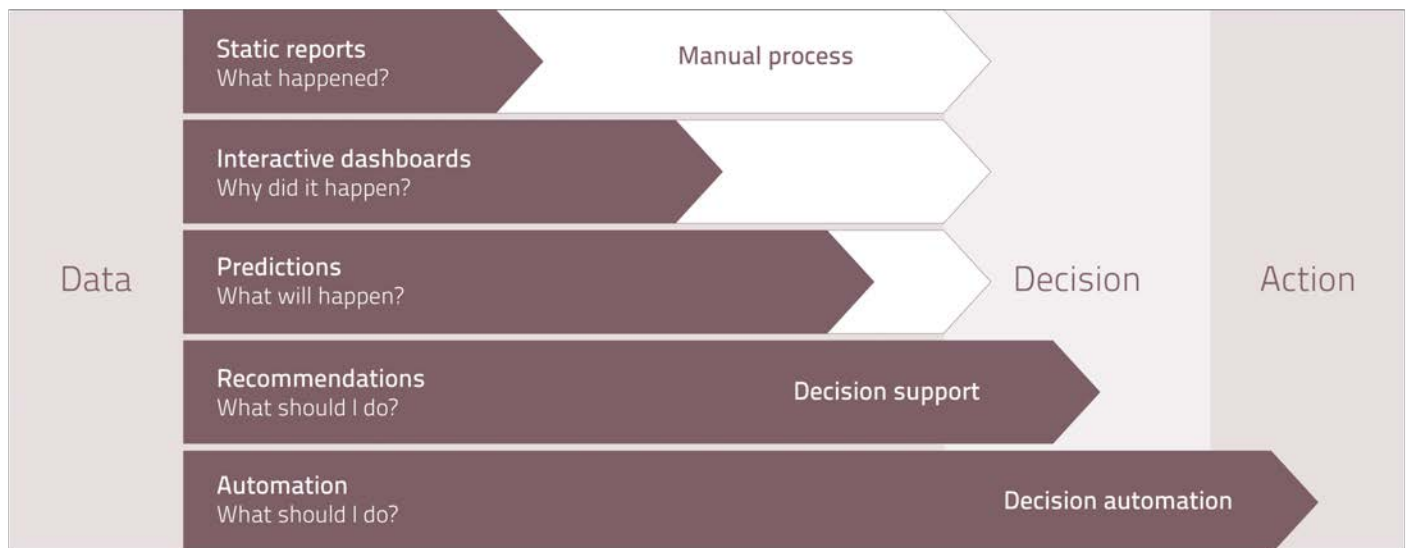

The C.A.R.S smart software platform is able to monitor, manage and operate countless installations, buildings and objects, independently and from any location. All this can be done with utmost mobility with use of a smartphone, tablet, laptop or PC. This is what we refer to as 'The World at Your Fingertips'.

Insight

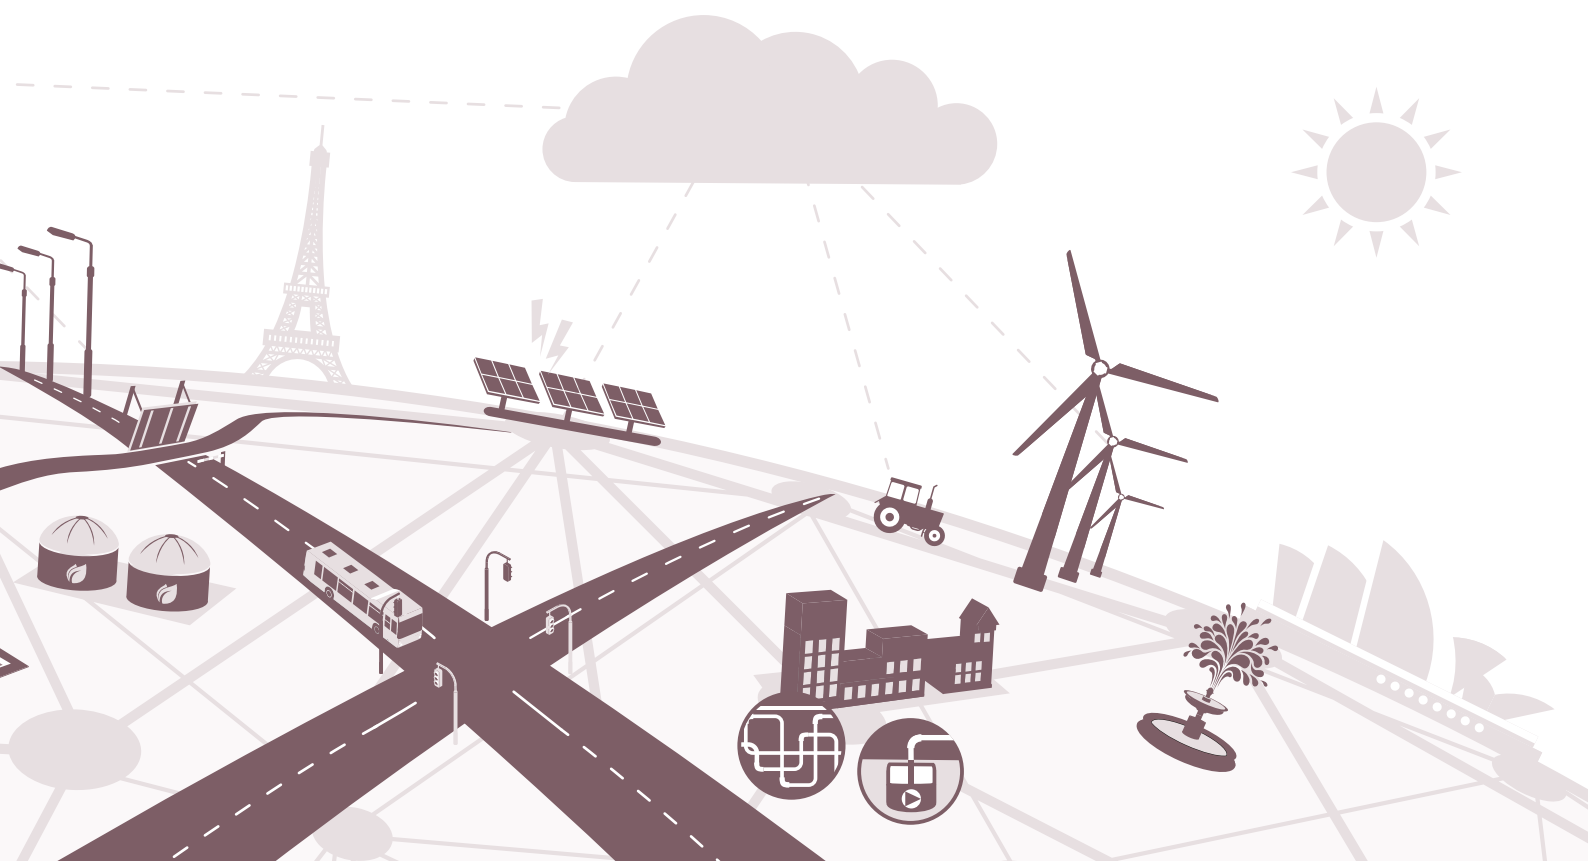

From data to decisions and actions

Value

Worldwide Monitoring & Control

Influence

The Internet of Things

The C.A.R.S information and control system allows people, installations and software to communicate interactively with each other through the cloud. Once they are connected to each other, C.A.R.S turns them into smart systems.

Value from data

The intelligent information and control system analyses big data and translates them into valuable information. Based on this information it is possible to make better decisions and even take preventive measures more quickly and efficiently. With C.A.R.S you can also automate processes to a much greater degree.

Reduced costs

Insight and control around the world results in longer lasting installations and objects. It gives you control over energy consumption, a grip on maintenance and a higher level of process knowledge.

Proactive maintenance

Reduced energy use

Increased lifetime

High-level process knowledge

Reduced costs

Worldwide Monitoring & Control

C.A.R.S does everything we can't or won't do ourselves:

- manages and operates a wide and varied range of installations and processes round the clock;
- is a Social, Mobile, Analytics and Cloud application (SMAC);
- guarantees maximum operational safety – Real Time Control (RTC);
- consists of clear, user-friendly process visualisation;
- includes the most extensive Supervisory Control And Data Acquisition (SCADA) possibilities;
- creates valuable information from data – Data Analysis;
- predicts maintenance – Maintenance management system (MMS);
- is not tied to any particular supplier or manufacturer.

This makes C.A.R.S the total solution for:

- machine and equipment construction;
- production & assembly companies;
- utility & energy companies;
- water management boards & environmental companies;
- data centres & computer suites;
- hospitals & office buildings;
- municipalities & provinces.
